UBE Announces Realignment of Injection Molding Machine Business

Ube Industries, Ltd.
Ube Machinery Corporation, Ltd.
U-MHI Platech Co., Ltd.
U&M Plastic Solutions Co., Ltd.

Ube Machinery Corporation, Ltd. (President: Hironori Miyauchi), a consolidated subsidiary of Ube Industries, Ltd. (President: Masato Izumihara), today announced it plans to absorb two of its subsidiaries by merger, as part of a realignment of its injection molding machine business. The two subsidiaries to be absorbed into Ube Machinery are U-MHI Platech Co., Ltd. (President: Koji Kubota) and U&M Plastic Solutions Co., Ltd. (President: Junichi Yonehara).

In conjunction with the merger, Ube Machinery also decided to merge UBE Machinery Inc. (UMI, President: Ichiro Motoki) and U-MHI Platech America Inc. (President: Yasuhiro Inoue), both of which are Ube Machinery's North American subsidiaries. The details of the mergers are as follows.

The realignment of the injection molding machine business is scheduled to be executed on August 1, 2020. In advance of this date, Mitsubishi Heavy Industries, Ltd. (President & CEO: Seiji Izumisawa) will transfer 15% of the shares in U-MHI Platech to Ube Machinery, which will make U-MHI Platech into a wholly-owned subsidiary of Ube Machinery.

1. Purpose of Realignment

Ube Machinery obtained 85% of the shares in U-MHI Platech from Mitsubishi Heavy Industries on January 1, 2017. Ube Machinery has endeavored to combine the respective technologies, product lineups, and sales and servicing networks of Ube Machinery and U-MHI Platech to expand the injection molding machine business in the global market.

At the same time, the business conditions for the injection molding machine business have become increasingly challenging both in and outside of Japan. In order to further expand the business in the global market, there is a need to further strengthen the product development, manufacturing, and servicing to supply new value to customers.

On August 1, 2020, U-MHI Platech will move from its manufacturing facility in Iwatsuka, Nagoya City to a new facility in Oe, Nagoya City, commencing operations at the tentatively-named Nagoya Factory. By establishing an efficient manufacturing framework for the global market that encompasses North America, the Ube Machinery Group will be better positioned to supply its global customer base with quality products. With the realignment, Ube Machinery will aim to increase its presence and expand its business in the injection molding machine market.

2. Data for Realignment

(1) Scheduled Date of Merger August 1, 2020

(2) Method of Merger

In Japan: Merger with Ube Machinery being the surviving company. U-MHI Platech and U&M

Plastic Solutions will be dissolved.

In the US: Merger with UMI being the surviving company. U-MHI Platech America will be dissolved.
